Forecast for Tuesday 10 Sep 2024

Weather: Cloudy with frequent outbreaks of light rain throughout the day. A band of heavier rain is expected for a time during the afternoon, before cloud and rain clear to the south leaving a dry and more settled night.

Chance of cloud-free hill tops above 600m: 50%, at times 30% in showers through the afternoon, becoming 80% by the evening and overnight.

Low cloud and visibility: Patches of cloud may shroud hills above 500m at times, perhaps lowering to 400m during any more persistent rain during the afternoon. Cloud lifting above all summits during the evening. Locally poor visibility in cloud throughout the day, but good to very good when cloud lifts above the hilltops.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

A much cloudier day than on Monday with some uncertainty on the timings of rain on Tuesday. Winds will be stronger too with gusts around 10mph higher on the summits than in the table above.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 09 Sep 2024	3.2mm	20.4mm	29mm

Forecast for Wednesday 11 Sep 2024

Weather: Sunshine and showers throughout the day. Showers heaviest through the morning, before becoming more isolated by the afternoon with longer and more prolonged sunny spells developing. Cloud continuing to clear into the evening leaving a dry and settled night.

Maximum wind: West-northwesterly 30 mph with gusts of 35-40 mph.

Chance of cloud-free hill tops above 600m: 80%.

Low cloud and visibility: Generally very good visibility with clear views from the summits throughout the day, however in any showers, expect periods with clouds obscuring hills above 700m and visibility falling to moderate or poor in rain and any cloud.

Temperature: **Valleys:** Plus 8 Celsius increasing to plus 12 Celsius.
At 600m: Plus 3 Celsius increasing to plus 5 Celsius.
Freezing level: Above the summits.
